# Competency Certification Center (CCC)

The objective of the Competency Certification Center (CCC) is to develop personnel involved with power plant maintenance to be knowledgeable in theory and in practice in order to increase their potential as a professional in the maintenance business. The development is in the form of one - stop training rooms where trainees can learn the theory from the experts and the practice from the real equipment. Such training will give them the in-depth knowledge. Furthermore, it is planned to award certificate to the trainee of each profession to upgrade the standard and increase credibility of the successful trainees.

## Scope of services

With expertise of the Maintenance Division, EGAT establishes training rooms based on specialty as follows:

1) Operation Testing Room for Power Plant
2) Electrical Machine Control Training Room
3) Electrical Testing Training Room
4) Electrical Protection Training
5) Power Plant Control System Training Room
6) Instrument and Control Valve Training Room

## Advantages

- The trainees can obtain knowledge in theory from experts with experience in maintenance and engineering and in practice with the real equipment.
- Training cost reduction. No need for training overseas.
- As the training is in Thai, it is easy to understand the subject clearly.

## EGAT's experiences

In 2018, the following training were organized:

| | |
|---|---|
| Number of training courses | 14 |
| Number of classes | 24 |
| Number of trainees | 467 |
